

**KARTA PRZEDMIOTU****I. Dane podstawowe**

Nazwa przedmiotu	Chemia ogólna i nieorganiczna
Nazwa przedmiotu w języku angielskim	General and inorganic chemistry
Kierunek studiów	Biotechnologia
Poziom studiów (I, II, jednolite magisterskie)	I
Forma studiów (stacjonarne, niestacjonarne)	stacjonarne
Dyscyplina	
Język wykładowy	Grupy w języku polskim – język polski Grupy w języku angielskim – język angielski

Koordynator przedmiotu/osoba odpowiedzialna	dr Artur Banach
---	-----------------

Forma zajęć (katalog zamknięty ze słownika)	Liczba godzin	semestr	Punkty ECTS
wykład	30	I	7
konwersatorium	20	I	
ćwiczenia	-	-	
laboratorium	30	I	
warsztaty	-	-	
seminarium	-	-	
proseminarium	-	-	
lektorat	-	-	
praktyki	-	-	
zajęcia terenowe	-	-	
pracownia dyplomowa	-	-	
translatorium	-	-	
wizyta studyjna	-	-	

Wymagania wstępne	Knowledge of chemistry on high school level, knowledge of physics and mathematics on the basic, high school level.
-------------------	--

**II. Cele kształcenia dla przedmiotu**

Familiarization students with basic chemical laws.
Familiarization students with atom and chemical particle structure and the importance of the periodic table.
Familiarization students with the chemical concepts used for description of chemical substances and processes, chemical formulas and reactions as well as concentrations of solutions, electrolytic dissociation and pH.
Discussion of the properties of the representative elements, their compounds, synthesis and application.

### III. Efekty uczenia się dla przedmiotu wraz z odniesieniem do efektów kierunkowych

Symbol	Opis efektu przedmiotowego	Odniesienie do efektu kierunkowego
WIEDZA		
W_01	Student describes issues in the field of physics, mathematics and chemistry required to understand and interpret basic natural phenomena and processes	K_W02
W_02	Students presents the principles of health, safety work and ergonomics, indicates the psychophysical possibilities of a human in the work environment in laboratory of chemistry	K_W09
UMIEJĘTNOŚCI		
U_01	Student carries out observations and performs chemical measurements	K_U02
U_02	Student describes, explains and interprets chemical and physicochemical phenomena at an advanced level	K_U08
U_03	Student performs qualitative and quantitative analyzes in chemistry by using classical and instrumental method	K_U10
U_04	Student prepares a written study on issues related to inorganic chemistry in English language using the scientific language	K_U13
U_05	Student learns independently in a targeted manner in the field of chemistry, updates his/her knowledge and skills, applies new research techniques and plans his professional development	K_U17
KOMPETENCJE SPOŁECZNE		
K_01	Student possesses appropriate habits required to the work in scientific chemistry laboratories, proceeds according to work safety regulations, knows how to react in states of danger	K_K04

### IV. Opis przedmiotu/ treści programowe

**Lecture:** Fundamentals of chemistry – general terms and chemical laws. Classification of matter, structure of matter, symbols and formulas. Matter and energy: physical and chemical change. Quantitative chemical relationships: atomic weight, moles and molar mass, quantitative measures and recalculations, stoichiometric calculations based on formulas and equations. Structure of atoms, atomic subparticles, electronic configurations. Periodic table of elements. Chemical bonding and intermolecular attractions: types of chemical bonds, shape and polarity of molecules, intermolecular forces, physical state of matter and solubility related to molecular structure. Mixtures: homo- and heterogeneous solutions, dispersion, percentage, molar and other ways to express quantitative composition, mixture separation. Reactions in solution: dissociation, ionic reactions, dissociation constant, Ostwald law, pH, salt hydrolysis, buffer solutions, precipitation. Basic inorganic chemistry: classification and properties of inorganic compounds, characteristics of main group elements, compounds of copper, iron, chromium and manganese.

**Classes:** Safety principles for work in the Chemistry Laboratory. General laboratory glassware and accessories used in the chemical laboratory. Quantitative Analysis: (1) Standardization of hydrochloric acid concentration with borax. (2) Determination of sodium hydroxide by titration method. Determination of salicylic acid by titration method. Qualitative analysis: (1) Qualitative analysis of selected cations. (2) Qualitative analysis of selected anions. (3) Qualitative analysis of the mixture of selected cations and anions. Reaction of oxidation and reduction (redox): (1) Hydrogen

peroxide as oxidizer and redactor. (2) Study on pH influence on the direction of redox reaction. Buffers. Preparation of buffers and examination of their properties. Chemical data processing.

**Tutorial:** Conversion of number of substance: an atom, molecule, atomic and molecular weight, molecular weight, concept of mole, number of moles, molar volume, and density. The equation of state of an ideal gas. The stoichiometry of chemical reaction: determining the chemical formulas based on percentage composition, calculate the weight, the number of moles and volume of reagent in chemical reaction. Types of solution concentrations: percent concentration, mole, the mole fraction. Conversion of concentration, mixing and dilution of solutions. Equilibria in solutions of electrolytes: ionic dissociation, electrolytes strong and weak, constant and degree of dissociation, Ostwald dilution law, ionic product of water, pH of solutions, salt hydrolysis, buffers, solubility product.

#### V. Metody realizacji i weryfikacji efektów uczenia się

Symbol efektu	Metody dydaktyczne (lista wyboru)	Metody weryfikacji (lista wyboru)	Sposoby dokumentacji (lista wyboru)
WIEDZA			
W_01	Conventional lecture  Laboratory analysis	Written exam  Test	Written exam Completed and evaluated test
W_02	Laboratory analysis	Observation	Rating card / Report from observation
UMIEJĘTNOŚCI			
U_01	Laboratory classes	Report	Protocol / Print / Report file
U_02	Laboratory analysis	Test	Completed and evaluated test
U_03	Laboratory classes	Report	Protocol / Print / Report file
U_04	Laboratory classes	Report	Protocol / Print / Report file
U_05	Practical exercises	Test	Completed and evaluated test
KOMPETENCJE SPOŁECZNE			
K_01	Laboratory classes	Observation	Rating card / Report from observation

#### VI. Kryteria oceny, wagi...

**Lecture:** Written exam in the form of test - 90%, participation in the lectures - 10%

**Classes:** 3 tests – 90%, active participation in the classes - 5%, preparation of report – 5%

**Tutorial:** 3 tests – 90%, active participation in the tutorial - 10%

Mark	Evaluation criteria	
<b>very good (5)</b>	the student realizes the assumed learning outcomes at a very good level	the student demonstrates knowledge of the education content at the level of 91-100%

<b>overgood (4.5)</b>	the student accomplishes the assumed learning outcomes an over good level	the student demonstrates knowledge of the education content at the level of 86-90 %
<b>good(4)</b>	the student accomplishes the assumed learning outcomes at a good level	the student demonstrates knowledge of the education content at the level of 71-85%
<b>quite good(3.5)</b>	the student accomplishes the assumed learning outcomes at a quite good level	the student demonstrates knowledge of the education content at the level of 66-70%
<b>sufficient (3)</b>	the student accomplishes the assumed learning outcomes at a sufficient level	the student demonstrates knowledge of the education content at the level of 51-65%
<b>insufficient (2)</b>	the student accomplishes the assumed learning outcomes at an insufficient level	the student demonstrates knowledge of the education content below the level of 51%

### VII. Obciążenie pracą studenta

Forma aktywności studenta	Liczba godzin
Liczba godzin kontaktowych z nauczycielem	<b>80</b>
Liczba godzin indywidualnej pracy studenta	<b>95</b>
